

Thank you for participating in the 2022 Local Government Procurement (LGP) modern slavery risk survey.

The intent of the survey was to assess the level of awareness and activity across all LGP approved contractors in relation to the detection and prevention of modern slavery in their own supply chains.

We are writing to inform you that, based on your survey response, Brandworx Australia has been assessed as having a modern slavery risk rating of:

This means that your business has awareness of modern slavery and related legislation and is currently undertaking activities to address modern slavery risks in your operations and supply chain.

Councils purchasing from LGP Contracts will be given access to this information, which will assist them in addressing and mitigating modern slavery risks within their supply chains.

Given the need to ensure that the risk ratings remain current, LGP plans to repeat this survey annually.
